

# ELK APPROVED

## SPRAY-IN-PLACE INSULATION SYSTEMS

---

### FACT SHEET

Elk premium roofing products are approved for use over many non-vented\* and vented specialty deck systems. These systems include applications over specific spray-in-place insulation applied to the underside of the roof deck.

**We take this area of our business very seriously and we have approved some non-vented specialty deck systems since the early 1980's. In addition to our field experience with these systems, here are additional reasons why you should consider Elk premium roofing products for application over approved spray-in-place insulation systems:**

- Elk has a state-of-the-art test facility at the Technology Center in Ennis, Texas, where we conduct our own testing and evaluation of specialty decks.
- Each specialty deck manufacturer is required to submit specific data, product specifications, guidelines, and MSDS for evaluation.
- All Elk products carry the full limited warranty over approved spray-in-place systems.
- Elk shingles are manufactured to perform in all climates and in all temperatures.
- Elk has 4 manufacturing plants located in California, Pennsylvania, Texas, and Alabama. Each plant has a technical services department and we have one specialist dedicated to provide technical assistance in the area of specialty decks.

### **Elk carries a full line of roofing and accessory products including:**

- Elk field shingles are offered in a wide range of looks for a wide variety of homes, including our Prestique® shingles with a visual depth and texture reminiscent of real wood. Prestique Grandé is 40% larger and brings a dramatic large-scale look to any roof. Domain® Winslow®'s large exposure gives a bold, wood-shake look and Capstone® has a distinctive slate-like appearance.
- Z® Ridge and Seal-A-Ridge® Hip and Ridge Shingles
- VersaShield® Underlayment
- All-Climate Self-Adhered Underlayment
- Ventilation Products
- Roof Accessory Paint
- CrossTimbers™ composite lumber is ideal for decks, patios, and fencing

For information regarding Elk premium roofing products, please contact the Elk location nearest you or visit our web site at [www.elkcorp.com](http://www.elkcorp.com). For information regarding specialty deck systems, please contact our Technical Services Department at 866-355-8324, ext. 6.

\*It is the responsibility of the design professional to examine the need for structural ventilation and to insure air quality. For any building, construction must be in compliance with local codes.
