Overview

- Standard grade southern yellow pine with radius edges
- Severe Weather Above Ground pressure treated exterior wood protected by Ecolife (EL2); a stabilizing formula that repels water keeps boards straighter and looking longer
- Ecolife (EL2) provides built-in water repellency that lasts for up to 3 years and reduces surface cracking and checking by up to 50% compared to ordinary treated wood
- Treatment meets American Wood Protection Association (AWPA) standards and is building code compliant (IRC and IBC)
- Lifetime limited warranty that protects against damage by fungal decay or termite attack which makes the wood structurally unfit for which it was intended
- For optimal performance of paint and stain coatings, allow the wood to dry after installation, and apply a UV protective finish to enhance the long-term beauty
- Install the deck boards tightly together, and pre-drill holes at the ends of boards to minimize splitting
- Use building code approved fasteners and hardware. Hot-dipped galvanized or stainless-steel is recommended
- Economical choice for decks, gazebos and above ground exterior projects
